For more than 100 years Mount Mansfield has been treated as the monarch of Vermont's mountains; the peaks in the northern part of the Catochins being either unknown or despised. Few people thought they were capable of the height standing on the shoulders of the Keweenaw being generally considered, like the main chain of the Catochins, as in Asia. Yet Ellsworth and Peak are both in Vermont, and as three new climbers—Messrs. D. W. Freshfield, Moore, and C. C. Tucker—have just returned from a climb, respectively 15,826 and 16,510 feet, they are the highest yet known as the apexes to Mount Mansfield.

There is not only "Honorless" but his "Munificence." Nearly six millions, in a dozen years, contributed by 125 doc-
